Veneer

Unlimited opportunities

Veneer is not just veneer

Bevola has chosen to add veneer to the product range in order to become an even more attractive business partner. Through a number of years, Bevola has been one of the largest suppliers of veneer for the Norwegian constructors and we now wish to offer this service to the rest of Scandinavia.

Our veneer is of the best quality and is made from 100 per cent birch from slowly grown trees in the cold Finnish and Siberian woods. The firm grain cell structure provides excellent strength properties and a high degree of dimensional stability without tension. The veneer comes in a uniform and homogeneous quality with phenol film, which provides a non-skid, durable and weatherproof surface.

More than just veneer

Bevola offers more than just veneer. We can deliver end-to-end solutions with machining and mounting in our ultramodern production facilities in Ringsted. We have employees with extensive experience in development, controlling and production, which, in combination with the newest CNC-controlled equipment, makes us competitive in the areas of price and quality. We have all the necessary facilities to participate in an innovative collaboration in relation to new developments and optimization.

There are many advantages of veneer collaboration with Bevola:

- Increased efficiency
- Less administration and control
- High and uniform quality in production
- Lower costs
- Fewer suppliers
- Better bottom line
- Competitive prices

**Let Bevola produce and obtain while you sell and deliver.
That is the direct way to common strength and success.**
